Neuroeconomics Decision Making and the Brain

Second, scholars within the emerging field itself have argued over what form neuroeconomics should take. To understand these debates, however, a reader must understand both the intellectual sources of neuroeconomics and the backgrounds and methods of practicing neuroeconomists. Neuroeconomics has its origins in two places; in

Neuroeconomics ScienceDirect

Much work in neuroeconomics has focused on how the neural mechanisms of decision making adjust for the immediate versus the future consequences of a choice. This chapter reviews the key theoretical, behavioral and neurobiological findings regarding such intertemporal tradeoffs.

<http://home.schoolnutritionandfitness.com/Neuroeconomics-ScienceDirect.pdf>

Neuroeconomics Decision making Theory Introduction and

So, overall, decision making theory, is concerned with goal directed behavior, in the presence of options. And neuroeconomics, also focuses on this aspects of our decisions. So, there are two types of decision making theories, normative decision making theory. A normative decision making theory describes how decisions should be made.

Neuroeconomics Wikipedia

Neuroeconomics is an interdisciplinary field that seeks to explain human decision making, the ability to process multiple alternatives and to follow a course of action. It studies how economic behavior can shape our understanding of the brain, and how neuroscientific discoveries can constrain and guide models of economics.

<http://home.schoolnutritionandfitness.com/Neuroeconomics-Wikipedia.pdf>

Neuroeconomics Investopedia

Neuroeconomics The neurobiology of value based decision

Neuroeconomics is a relatively new discipline, which studies the computations that the brain makes in order to make value-based decisions, as well as the neural implementation of those computations. It seeks to build a biologically sound theory of how humans make decisions that can be applied in both the natural and the social sciences.
