Download PDF Ebook and Read Online Research Journal Of Pharmaceutical Dosage Forms And T. Get **Research Journal Of Pharmaceutical Dosage Forms And T Research Journal of Pharmaceutical Dosage Forms and Technology**

Research Journal of Pharmaceutical Dosage Forms and Technology (RJPDF T) is an international, peer-reviewed journal, devoted to pharmaceutical sciences. The aim of RJPDF T is to increase the impact of pharmaceutical research both in academia and industry, with strong emphasis on quality and originality. RJPDF T publishes Original Research Articles, Short Communications, Review Articles in all areas of pharmaceutical sciences from the discovery of a drug up to clinical evaluation.

### **Research Journal of Pharmaceutical Dosage Forms and Technology**

The Quality control (QC) tests like weight variation, hardness, friability, drug content, and In vitro dissolution studies were performed for three commercially available brands containing the combination of two anti diabetic drug pioglitazone (15mg) and metformin (500mg) hydrochloride. The dissolution studies were performed in 0.1N hydrochloric acid (pioglitazone HCl) up to 45 minutes and in 6

### **Research Journal of Pharmaceutical Dosage Forms and Technology**

The present study aims at designing and evaluating a buccal mucoadhesive tablet of Metronidazole using mucoadhesive polymers like HPMC, Sodium CMC, Carbopol 934, Ethyl cellulose. Both Non aqueous granulation and direct compression methods were studied. Various evaluation parameters such as swelling index, ex-vivo mucoadhesive strength, in-vitro drug release, drug content and in-vitro

### **Solid Dosage Processing and Packaging Pharmaceutical**

Solid dosage processing involves a variety of technologies in order to take an active pharmaceutical ingredient (API) and potentially combine it with excipients to create a finished dosage, such as a capsule or tablet. Once that solid dosage is in its final form, it must be properly packaged for distribution. Generally speaking, oral solid dosage forms are the most commonly used

### **Review Article Remarkable Contribution of Natural**

clear that any pharmaceutical dosage forms cannot be formulated without the use of excipients. Excipients are the major part of formulation. They do not show any adverse effect but promotes the therapeutic activity of Pharmaceutical products. The bio-availability and stability of dosage form directly depends on the nature of excipients.

<http://home.schoolnutritionandfitness.com/New-Simple-Spectrophotometric-Method-for-the-Simultaneous-.pdf>

### **Dropwise Additive Manufacturing of Pharmaceutical Products**

In this work, DAMPP was used to create dosage forms from solvent based formulations consisting of API, polymer, and solvent carrier. The forms were then analyzed to determine the reproducibility of creating an on target dosage form, the morphology of the API of the final form and the dissolution behavior of the drug over time.

<http://home.schoolnutritionandfitness.com/Dropwise-Additive-Manufacturing-of-Pharmaceutical-Products-.pdf>

### **Pharmaceutical Sciences And Research**

Quality of a pharmaceutical product i.e. solid dosage form (tablet) can be guaranteed by evaluating different physical, chemical and microbiological test of from raw materials to finished product 1, 3. All parameters of excipients and API s should lie under limit such as bulk density, particle size and moisture content etc.
