Understanding evolution of the Swedish model change or

In this paper we claim that the Swedish model should be perceived by a dynamic relation between its two pillars, namely economic and welfare policies. It is this relation that explains its creation, evolution, and recent transformation. Also, the Swedish model was not only an economic or social project, but it concerned a society as a whole.

The Dualities of the Swedish Welfare Model

The welfare model in Sweden is therefore not primarily a reformist strategy, but an ontological understanding of capitalism and socialism as class collaboration, i.e. the idea that socialism grows from within capitalism with the socialisation of consumption and large-scale production.

The Swedish model was first challenged in 1976 by the Meidner Plan promoted by the Swedish Trade Union Confederation and trade unions which aimed at the gradual socialization of Swedish companies through wage earner funds.
