Meta Keywords What They Are and How They Work WordStream

Meta Keywords are a specific type of meta tag that appear in the HTML code of a Web page and help tell search engines what the topic of the page is. Meta keywords are distinguished from regular keywords because they appear behind the scenes, in the source code of your page, rather than on the live, visible page itself. They look like this:

<http://home.schoolnutritionandfitness.com/Meta-Keywords--What-They-Are-and-How-They-Work-WordStream.pdf>

Find Out Which SEO Keywords Your Competitors are Using

The easiest way to find out the keywords your competitors are using is to visit their website and then view the Page Source or the underlying HTML code for their homepage. In Google Chrome, you simply click the tools bar (the three lines in the top right-hand corner) then select Tools > Developer Tools. This will display the Source Code in a window underneath the website itself.
